

Achieve a Lifted Neck, Chest & Decollete

In Just 3 Weeks With SAIAN Neck and Chest Creme Featuring

The Newest Clinically Tested Anti-Gravity Ingredients - Majestem™ & Idealift™

With age, the effects of gravity on the skin become more and more visible. The skin is not as firm and it begins to sag. SAIAN Neck and Chest Lift Creme is the newest product on the market which produces a visible lifting action on the face, neck, decollete, and chest in as little as 3 weeks! Our clinical strength anti-aging product features **Majestem™**, an incredible ingredient, which lifts the sagging skin of the neck and decollete area. It protects against oxidative stress (air pollution, UV radiation) and recreates skin tension by restoring the mitochondrial dynamism, the first active ingredient to provide a visible lifting action.

Tests have shown that in just three weeks the sagging neck skin is significantly tightened (surface -10.6% up to -56%)* and the neck folds are evened out. After six weeks, the cheeks are visibly lifted and crow's feet wrinkles are smoothed out (surface -11% up to -75%)*. **Majestem™** is derived from HTN Edelweiss plant stem cell culture and is completely safe and non-toxic.

Idealift™ fights against cutaneous sagging and decreases the visible effects of gravity on the skin which accentuates flaccid jowls due to aging or daily aggressions. Based on a lipopeptide, **Idealift™** acts on the skin's fibroblasts and stimulates the synthesis of a number of proteins involved in the building of the elastic tissue such as tropoelastin, fibrillin-1, fibulin-5, and lysoloxidase. In vitro tests showed an increase of more than 94% in the settling of elastin/tropoelastin in the extracellular matrix after **Idealift™** had been administered to fibroblasts. It not only stimulates elastin synthesis but also promotes a correct and functional elastic fibre architecture by inducing the most important elements involved in tissue structure.

Tests were carried out on 26 female volunteers aged 54 to 75 years old with sagging skin. Women applied twice a day a cream containing 4% **Idealift™** for 2 months. Effects of this new active ingredient were proven after just one month. They were confirmed by using various evaluation techniques (Aeroflexmeter®: a new device developed and patented by Sederma, FOITS and self-evaluation). The visible effects of gravity decreased and cutaneous sagging was fought and for 80% of panellists their skin was firmer.

We have developed an ideal protocol for firming the jowls, neck, chest, and decollete using this new anti-gravity lifting creme, collagen masks, and red phototherapy.

1. Cleanse the skin of the face, neck and chest with SAIAN® Replenishing Cleanser.
2. Mix SAIAN® Enzyme Mask with water to achieve a thin paste. Apply to the face, neck and chest, and steam for 10 minutes. You may also use a hot towel, in place of the steamer, to keep the mask moist.
3. Remove the SAIAN® Enzyme Mask, and apply the contents of 1 SAIAN® Pure Hyaluronic Acid Ampoule to the entire face, neck, chest, and decollete area.
4. Spray the area with SAIAN® Pure Collagen and Elastin Spray thoroughly.
5. Apply 1 SAIAN® Pure Collagen Mask to the face vertically, and one to the chest, horizontally. Press onto the face with moist sponges.
6. Wrap with the Neck Bandage.
7. Apply goggles to client to avoid direct eye contact with phototherapy device.
8. Use the SAIAN® Mini-Cavi Pro Machine on the RED Light phototherapy setting for 5 minutes at a time above the mask. This helps penetration, and increases the skin's collagen production.
9. Remove the mask and bandage after 20 minutes, and follow with SAIAN® Neck and Chest Lift Creme.
