NATURAL CLINICAL

Botanical Stem Cell Mask

Chinese Basil

Chinese Basil is rich in Omega-3 and Rosmarinic Acid, and exhibits potent anti-oxidant properties. Chinese Basil reduces inflammation and lessens the damage created by free radicals.

Perilla frutescens extract - rosmarinic acid

White Oak Bark

White Oak Bark is a skin-soothing, anti-aging, anti-oxidant and anti-inflammatory ingredient. It is known to absorb toxins and soothe irritated skin. Its anti-oxidant properties make it ideal for anti-aging treatments.

Quercus alba bark extract - tannic acid

Acai Berry Extract

Acai Berry extract has antioxidants, amino acids, essential fatty acids, fiber, protein, and plant sterols. Native to the tropical Central and South American Amazon, the Acai palm grows in extremely high temperatures, and can withstand intense UV radiation. It's packed with vitamins A, B1, B2, B3, C & E.

Euterpe oleracea fruit extract - ferulic acid

Transdermal Absorption of our Revolutionary Botanical Stem Cell Complex While You Sleep

The skin's loss of firmness and flexibility can be traced back to unprotected sun exposure. The potent plant stem cell extracts we use, and their respective secondary metabolites have been demonstrated in laboratory studies to reduce damage to existing collagen and elastin fibers from ultraviolet radiation in several ways:

- Plant stem cell extracts modulate pro-inflammatory cytokine production following exposure to ultraviolet radiation.
- They suppress UV-induced free radicals—evident by their high oxygen radical absorbance capacity (ORAC) scores that contribute to oxidative stress involved in the destructive cross-linking of healthy collagen and elastin fibers.
- By inhibiting free radical generation, plant stem cell extracts protect DNA and preserve the natural order for regenerating new collagen and elastin.
- Ultraviolet radiation alters mitochondrial energy production in dermal fibroblasts, resulting in less energy in the form of adenosine triphosphate (ATP). This slows down cellular activities that maintain firm and smooth skin. By ramping up ATP production, plant stem cell extracts replenish energy levels to improve cellular metabolism, promote new collagen and elastin, and boost DNA repair.

SAIAN remarkable Botanical Stem Cell Mask uses the latest stem cell technology to derive powerful actives from Acai Palm, Chinese Basil, and White Oak resource materials. These derivatives impart antioxidant, protectant, and anti-aging benefits. The secret is in this mask's unique transparent, breathable, nourishing, odorless, and non-sticky film base.

Simply apply by smoothing gently over the entire face, avoiding eye area, wait until completely dry, and go to sleep with it on. While you sleep, SAIAN Botanical Stem Cell Mask sits comfortably on the face, and doesn't rub off on your pillow. Its hydroscopic and breathable barrier properties ensure the skin locks in moisture, and breathes uninterrupted. It is easy to remove with a light wash, upon waking up.
