

Hydrating Cellulosic Mask

This gentle cellulosic mask replenishes the skin's moisture levels with hyaluronic acid, and reduces the appearance of fine lines and wrinkles with Argireline. This mask's soft blend of allantoin and seaweed extract soothes, and nourishes the skin without any added parabens, fragrance or color.

Store **Saian Hydrating Cellulosic Masks** in the refrigerator, and apply after RF treatments, or micro needling. These masks were created as a follow-up after the Saian FirmAge machine.

Apply the masks with LED lights at the end of the facial. Using **Saian Hydrating Cellulosic Mask** will help bring out the anti-aging benefits of the lights.

Store the masks in room temperature for daily use, and apply 3 times a week at home for a more moisturized, refreshed appearance!

Cellulose • Most abundant natural resource on earth. • It is obtained from wood pulp of eucalyptus, bamboo and pine. • Our masks are manufactured in France, using the best ingredients.

The raw material that makes lyocell is wood. It's an environmentally green material, because this cellulosic fiber is harmless to human body, and can be completely decomposed in the earth! Imagine cotton's high absorption, the stretch of polyester, and the soft and comfortable feeling of silk. It comes pre-soaked with gel inside the pouch, and doesn't rip during application. This is a brand new type of fabric, and these masks perfectly hug facial contours for better penetration of active ingredients.
