

SAIAN

device trade-in & recycling program

As estheticians, we understand you're on a budget, and it can become a challenge to keep updating your tools every few years. Even though our machines are well-crafted, and have proven to stand the test of time, we have decided to create a handheld device trade-in and recycling program for our loyal customers.

This program includes the following handheld devices purchased directly from SAIAN LLC year 2015 and prior, including:

Skin Pro 2
"Beautty" Device
Mini-Cavi
GEM Pro
High Frequency
Beauty Lift
Beauty Tone

No questions asked - send back your device in any condition, and you will be able to buy ANY new device for 50% off plus free shipping within USA and free samples.

In an effort to be more environmentally responsible, upon receipt of the device, we will take it apart and properly recycle the batteries and the plastic casing for you. You will receive a call from our knowledgeable staff, who will assist you with choosing the new device and ship it to you free of cost!

There are 2 important things to keep in mind when returning the devices to us:

**Please complete and print the PDF form on page 2. Include this form with your device.
Please ship only items that have been purchased directly from us - SAIAN LLC.**
